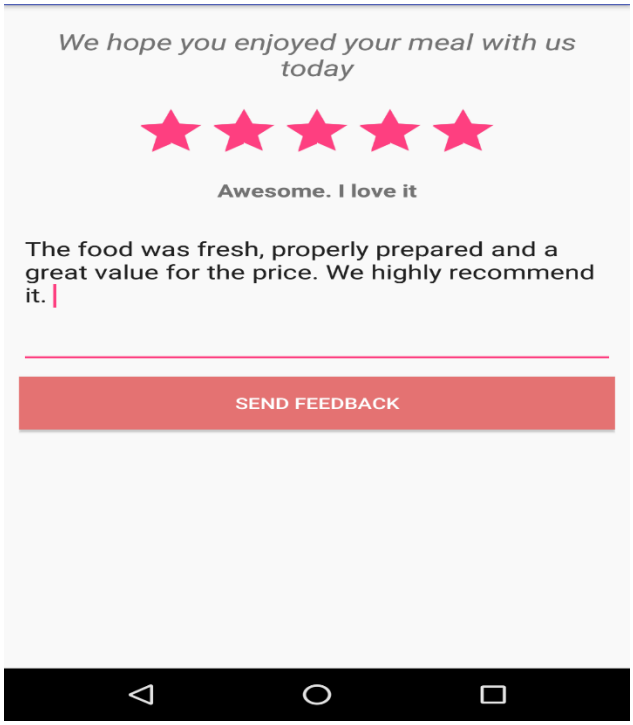
PROBLEM SHEET 3

Create below screen design using **Linear layout and relative layout separately**

Create a Feedback Android app for the given below screen design using any of the layouts.



When rating star is clicked, the below messages should displayed immediately. (that is based on OnRatingChanged listener). Selection should be whole number (Fraction is not allowed)

5 - Awesome. I love it

4 - Good. Enjoyed it

3 - Satisfied.

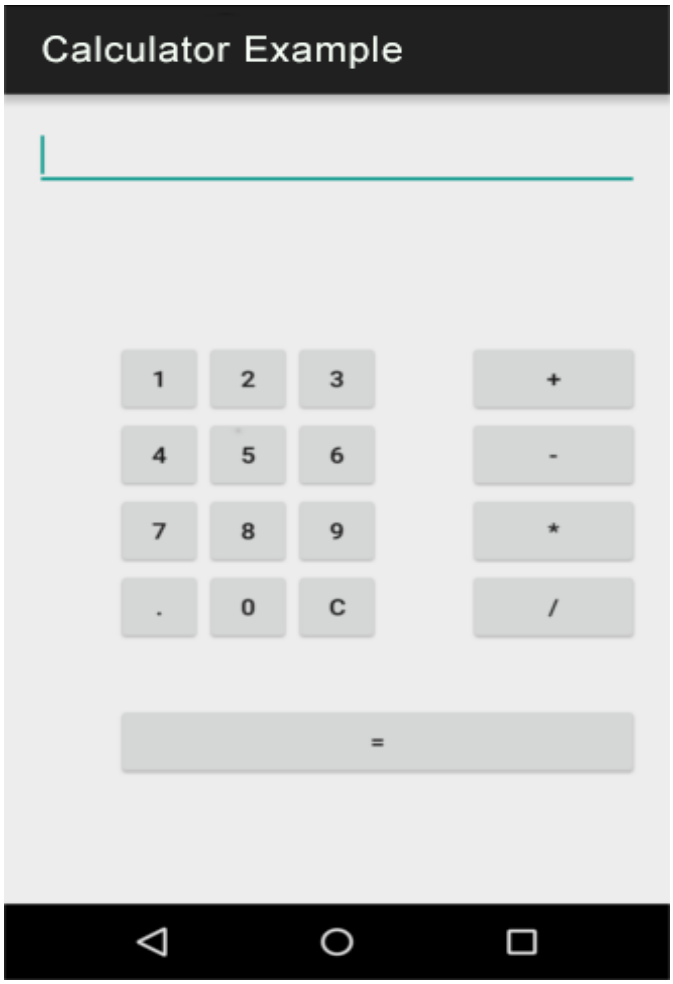
2 - Not good. Need improvement

1 - Disappointed. Very poor

Message is required and maximum allowable characters should be 100

When send feedback button is clicked, display the entered message (Textview – use colors from colors.xml) in **next screen** (Use Indent)

Create a Calculator Android app for the given below screen design using any of the layouts.



When = button is pressed, display the answer in toast message. Also perform validation for DivideByZero.
